

## Crusader 30 Gallon Vacuum Front Mount Squeegee

Undo the strap that holds your vacuum onto the cart, then remove your vacuum from the cart and turn the cart upside down.

1. Tip your cart over so that the bottom is up and mount the squeegee arm and bracket sub-assembly to the bottom of your cart with the arms sticking out the front between the casters with the 4 carriage bolts and lock nuts provided. The two tabs on the kick plate should be on the front side of the axle (side with front casters mounted to base).
2. Tip the cart back over and mount the front mount squeegee channel assembly to the two arms on the front of the vacuum with the 2 ¼” bolts and nylok nuts provided.
3. Place your vacuum back on the cart and fasten the strap.
4. Hook one end of the hose to the front mount squeegee channel assembly and the other end of the hose to the intake of your vacuum.
5. Your front mount squeegee is now ready for use.
6. To operate, lift up on the bottom lip of the rear kick plate with your foot to drop the squeegee to the floor. Press down on the rear kick plate to lift the squeegee off of the floor. The squeegee will pick up liquid both forward and reverse.
